The important patient data you need, where and when you need it

The small and portable Wireless Vital Signs Monitor (WVSM) collects the data you need to make critical decisions, even in remote, limited access, and multi-patient environments.

The WVSM allows a single caregiver to wirelessly monitor up to 20 patients simultaneously on a tablet, PC, or smart phone with Athena Device Management Suite (ADMS) via Wi-Fi, peer-to-peer network, or BLE.

The ruggedized WVSM is ideal for patient monitoring in multiple emergency scenarios, both civilian and military. Lightweight portability enables live monitoring of vitals, from point-of-injury and throughout care.

**AUTOMATICALLY MONITORS**
SpO2, HR/PR, NIBP, & ECG

**WIRELESS MONITORING RANGE OF 200 YARDS**

**REMOTE CONNECTIVITY USING ADMS**

**FDA cleared**
WVSM FEATURES

Patient data is gathered automatically thus freeing a provider for other duties. Multiple providers can also access patient information on-scene via ADMS. EMTs and Incident Commanders can access the same information in near real-time to make informed decisions about triage and patient transport. All patient data is color-coded based on user set parameters enabling easy triage.

- Highly portable
- Wired or wireless connectivity
- Red, yellow, and green status indicators
- Wireless range of up to 200 yards
- Turn key solution with all consumables ready to deploy
- Stays with the patient from point-of-injury until treatment

APPLICATIONS

FIRE REHAB
Patient-worn monitor allows for freedom of movement in the rehabilitation area.

EXTRICATION
Monitor patients with limited access from a distance.

TRIAGE/MCI
Monitors up to 20 patients on one compatible laptop, tablet, or smart phone.

EMERGENCY DEPARTMENT
Monitor multiple ambulatory patients simultaneously in crowded waiting rooms.

HAZMAT
Monitor responders inside level A suits.

INFECTIOUS DISEASE
Wireless transmission and small size allows for remote monitoring of BOTH patient and caregiver under isolation gear while minimizing volumes of contaminated equipment.

HIGH ANGLE RESCUE
Fits inside a Stokes litter. Does not interfere with climbing harness.

SEARCH AND RESCUE
Ruggedized to military specs, small and lightweight for ease of carriage.

STRUCTURAL COLLAPSE
Small size and rugged construction goes where others can not.
